Example PRD for Smart Meeting Scheduler

Document Objective

This document outlines the requirements for the Smart Meeting Scheduler, an AI-powered tool that streamlines scheduling for remote and hybrid teams by offering intelligent time slot suggestions and calendar integration.

Market Problem

Remote teams spend hours coordinating meetings manually. Current tools lack intelligent recommendations and fail to resolve time conflicts across time zones effectively.

Market Opportunity

The collaboration software market is growing at over 10% annually. There is a rising demand for smart productivity tools that reduce friction and automate repetitive tasks like scheduling.

Product Features

- Google Calendar Integration
- AI-driven Time Slot Suggestions
- Smart Reminders
- Privacy-first, no data retention
- Simple UI for non-technical users

Success Metrics

- 60%+ users report time saved
- 3+ real meetings scheduled per pilot team
- Positive NPS and feedback from launch users
